[Byword 2.6 MAS](#)

The screenshot shows the Byword 2.6 MAS application interface. At the top, there is a toolbar with various icons for file operations like Open, Save, Print, and zoom. Below the toolbar, the title bar says "Session: New Session". The main window has two tabs: "Find and Get" (selected) and "Graph Queries".  
In the "Find and Get" tab, there is a search bar containing "Interactions (all types)" and a dropdown menu showing "BMP Signaling". Below the search bar, there is a section for "Example queries" and "search fields". On the right side of the search area, there are global filters for "Datasources" and "Organisms". Under "Datasources", "WikiPathways" and "PANTHER Pathway" are checked. Under "Organisms", "Homo sapiens" is checked.  
The main content area displays search results for "BMP Signaling". It shows a list of interactions categorized by type (e.g., Degradation, Control, TemplateReactionRegulation, BiochemicalReaction, Transport, ComplexAssembly) and source (e.g., BioPAX Type, Datasource). One specific interaction is highlighted:  
**Formation of a heteromeric BMP receptor complex**  
The ligand trap binds the ligand BMP2, blocking BMP signalling  
Ubiquitin-dependent degradation of the SMAD complex terminates TGF-beta signalling  
SKI/SKI binds SMAD complex, suppressing TGF-beta signalling  
OTUD5 deubiquitinates TRAF3  
SOCS1 as a regulator of KIT signalling  
Hh-dependent expression of GLI1 gene  
GLI:SUFU translocates to the ciliary tip in response to Hh signalling  
GP369 inhibits activation of amplified FGFR2 signalling  
Downregulation of c-Kit signalling by SOCS6  
CLIP3 and CYLD bind TNF signalling complex  
...  
Below this, there is a summary and details panel for the highlighted interaction, showing the BioPAX Object, Type, Name, and an excerpt from the source text.

Walk with us through Psalm 122 to look deeper into the Hebrew text, and learn how to pray for the peace of Jerusalem.. Although the enemy is working overtime to bring the opposite of 'shalom' in Jerusalem, we can pray for beauty of God's kingdom rule to come down and meet the reality here on earth.

The screenshot shows the Cytoscape application window. The top menu bar includes 'File', 'Edit', 'View', 'Graph', 'Analysis', 'Help', and 'Session: New Session'. Below the menu is a toolbar with various icons for file operations like Open, Save, Import, Export, and zoom. The main workspace is divided into several panels:

- Left Panel:** A tree view titled 'Interactions (all types)' under 'BMP Signaling'. It lists categories like BioPAX Type (Degradation: 2, Control: 15, etc.), TemplateReactionRegulation: 2, BiochemicalReaction: 51, etc. A search bar at the bottom says 'Search'.
- Top Center Panel:** A search bar with placeholder 'Example queries: TP53, BRCA1, SRY, name kinase AND pathway.signal\*' and a 'Search' button.
- Top Right Panel:** Global filters for queries, including 'Data sources' (WikiPathways, CORUM, PANTHER Pathway, MIRTarBase, Integrating Network Objects with Hierarchies, KEGG Pathway, HPRD) and 'Organisms' (Homo sapiens).
- Middle Panel:** A large panel titled 'Matching interactions' showing a list of interactions. One entry is highlighted: 'Formation of a heteromeric BMP receptor complex'. Below it is a detailed description: 'The ligand trap binds the ligand BMP2, blocking BMP signalling. Ubiquitin-dependent degradation of the SMAD complex terminates TGF-beta signalling. SKI/SKIL binds SMAD complex, suppressing TGF-beta signalling. OTUD5 deubiquitinates TRAF3. SOCS1 as a regulator of KIT signalling. Hh-dependent expression of GLI1 gene. GLI:SUFU translocates to the ciliary tip in response to Hh signalling. GP369 inhibits activation of amplified FGFR2 signalling. Downregulation of c-KIT signalling by SOCS6. CLIP3 and CYLD bind TNF signalling complex.'
- Bottom Panel:** A summary panel with tabs 'Summary' and 'Details'. It shows a 'BioPAX Object' named 'Formation of a heteromeric BMP receptor complex' with type 'BiochemicalReaction'. It also displays an 'Excerpt' of the interaction description and 'Data sources' information.
